

PadeYa Go-Live Roadmap Checklist

Brand: PadeYa. Complete this checklist before calling live SEO launch done. Do not submit Search Console indexing until section 5 strict smoke passes.

1. Clean demo data (before flipping production)

- ☐ Confirm Neon is the live DB you will keep
- ☐ While APP_ENV is still NOT production, run:
- ☐ `cd backend && DEMO_MODE=true python -m scripts.reset_demo_data`
- ☐ Confirm gone: demo-* events, demo merch, @demo.padeya.test users
- ☐ Confirm kept: any real hosts/content you want live
- ☐ Do NOT re-run seed_demo_data after this

2. Real inventory (required for SEO / strict smoke)

- ☐ At least 1 listed public event
- ☐ At least 1 public host Legacy (/u/{username})
- ☐ At least 1 indexable merch product (/merch/{slug}, not drops/vault)
- ☐ Optional: at least 1 public sponsor and 1 public fan
- ☐ Confirm they appear in API and (after cache) sitemap.xml

3. Production environment

- ☐ APP_ENV=production
- ☐ DEMO_MODE=false
- ☐ NEXT_PUBLIC_SITE_URL=https://padeya.com
- ☐ Frontend NEXT_PUBLIC_API_URL points at live API
- ☐ Backend DATABASE_URL points at Neon (or final prod DB)
- ☐ Disable demo seed flags / demo helper
- ☐ Rotate secrets if demo credentials were ever shared

4. Deploy SEO code (Phases 0A-1C)

- ☐ Commit + deploy current SEO work to frontend + backend
- ☐ Confirm live: Organization/WebSite JSON-LD on /
- ☐ Confirm live: missing entities return real HTTP 404
- ☐ Confirm robots: private disallows + Sitemap https://padeya.com/sitemap.xml
- ☐ Confirm /events/search is noindex and NOT in sitemap

5. Production SEO smoke

- ☐ `cd frontend`
- ☐ `npm run test:seo && npm run build`
- ☐ `SEO_BASE_URL=https://padeya.com npm run seo:production-smoke`
- ☐ `SEO_SMOKE_STRICT=1 SEO_BASE_URL=https://padeya.com npm run seo:production-smoke`
- ☐ Non-strict: PASS
- ☐ Strict: PASS (needs real inventory)
- ☐ No demo URLs in sitemap

PadeYa Go-Live Roadmap Checklist

6. Search Console (only after smoke is green)

- ☐ Verify padeya.com (DNS TXT preferred)
- ☐ Optional: GOOGLE_SITE_VERIFICATION / Bing env
- ☐ Submit <https://padeya.com/sitemap.xml>
- ☐ Inspect: /, one event, one host, one merch (+ sponsor if live)
- ☐ Request indexing only after inspect looks healthy
- ☐ Expect indexing over days/weeks, not minutes

7. Analytics / privacy

- ☐ Keep first-party analytics as primary
- ☐ Decide: leave GA4 unset OR set NEXT_PUBLIC_GA_MEASUREMENT_ID + consent on /cookies
- ☐ Confirm GA4 never loads in non-prod / without Allow

8. Performance spot-check (manual)

- ☐ PageSpeed / Search Console CWV on: /, /events, event detail, host Legacy, merch detail
- ☐ Record LCP, INP, CLS

9. Post-launch watch

- ☐ GSC coverage / excluded pages
- ☐ Soft-404s / crawl errors
- ☐ Sitemap growth as real inventory ships
- ☐ No staging/preview indexed
